

Replit Prompt: Salon-at-Home Booking Web App

Description

Create a responsive salon booking application that allows users to:

- View salon services with images
- Fill out a booking form
- On submission, send all details to a WhatsApp number with a prefilled message

No database or backend needed -- all actions are client-side only.

Tech Stack

- HTML for structure
- CSS for styling & responsive design
- JavaScript to handle form data & WhatsApp redirection
- WhatsApp API (<https://wa.me/>)

File Structure

```
/index.html
/style.css
/script.js
/images/
  haircut.jpg
  facial.jpg
  waxing.jpg
  pedicure.jpg
  massage.jpg
```

Services to Include (with Images)

Service	Image file
----- -----	
Haircut	images/haircut.jpg
Facial	images/facial.jpg
Waxing	images/waxing.jpg
Pedicure	images/pedicure.jpg
Massage	images/massage.jpg

-> Upload these images into your /images folder in Replit or directly link from free sources like Unsplash or Pexels.

Required Functionality

Replit Prompt: Salon-at-Home Booking Web App

Booking Form Fields:

- Full Name
- Phone Number
- Select Service (dropdown or image options)
- Date
- Time
- Address

On Form Submission:

- Validate fields
- Format a WhatsApp message
- Open WhatsApp with this message sent to your number

Example Message:

Hello! I'd like to book a salon service.

Name: Keerthu

Phone: 9876543210

Service: Haircut

Date: 28-07-2025

Time: 4:30 PM

Address: 1234, MG Road, Bengaluru

WhatsApp Integration Code

```
const phone = "91XXXXXXXXXX"; // your WhatsApp number
```

```
const message = `Hello! I'd like to book a salon service.
```

```
Name: ${name}
```

```
Phone: ${phoneInput}
```

```
Service: ${service}
```

```
Date: ${date}
```

```
Time: ${time}
```

```
Address: ${address}`;
```

```
const url = `https://wa.me/${phone}?text=${encodeURIComponent(message)}`;
```

```
window.open(url, '_blank');
```

Success Criteria

[X] Fully client-side app

[X] Clean service layout with images

[X] Simple appointment form

Replit Prompt: Salon-at-Home Booking Web App

[X] No login, no backend

[X] Seamless WhatsApp redirection with form data
